

Dinghy Safety

A MESSAGE FROM ROYAL FRESHWATER BAY YACHT CLUB

Stay Safe During Boat Maintenance

A little care in the workshop goes a long way.

Whether you're repairing your dinghy, servicing a trailer or making small modifications, taking a few simple precautions can help prevent injury. Before you start:

- Wear the right personal protective equipment (safety glasses, gloves and hearing protection where required).
- Use the correct tool for the job and check it's in good condition.
- Keep your work area clean and free from trip hazards.
- Take care when using sharp tools, power tools, resins and adhesives, and ensure you have good ventilation.

Safe repairs today, mean more enjoyable sailing tomorrow.

Safety – it's everyone's responsibility
