

Dinghy Safety

A MESSAGE FROM ROYAL FRESHWATER BAY YACHT CLUB

Safety Hub

Safety underpins all sailing activities in Australia

The geography and climate of Australia are well suited for sailing. However, conditions can vary greatly and can change quickly from a calm day to very challenging. Therefore, safety must feature as a high priority for everyone involved in sailing.

Australian Sailing has recently launched the Safety Hub which combines practicality with accessibility. It provides many important safety resources relevant to on and off-water sailing activities, including:

- + Risk and Incident Management
- + Safety Information Notices
- + Online Safety Induction
- + Major Incident Reports
- + Equipment Auditing
- + Special Regulations
- + Safety News Updates

Go to sailingresources.org.au/safety for online access to the AS Safety Hub.

Safety - its everyone's responsibility
